

Brainstorming & Idea Prioritization Template

Date	09 July 2025
Team ID	SWUID2026211863
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Nalli Harshith Reddy	Collect the crop dataset, prepare the project workflow, and design the Entity Relationship Diagram	Data Collection & Planning	1
2		Define the business problem, gather requirements, and conduct the literature survey	Problem Analysis	1
3		Perform dataset reading and exploratory data analysis	Data Analysis	2

4		Preprocess the dataset, handle outliers, split data, and build machine learning models	Data Preprocessing & Model Building	2
5		Develop the Flask web application, integrate the trained model, and deploy the prediction system	Web Development	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Problem Definition, Requirements, Dataset Collection, and Project Planning	High	High	1	Yes
2	Data Analysis, Preprocessing, and Machine Learning Model Development	High	High	2	Yes

3	Flask-Based Web Application for Smart Crop Recommendation	High	High	3	Yes
---	---	------	------	---	-----
